1.0 PURPOSE/SCOPE

Atkins Gregory believes that Environmental Issues are of such paramount importance that they merit a Statement of Intent on behalf of the Company and to all those involved in its activities.

- We will respect the environments weaknesses and uphold the law and regulations relating to it
- We will work diligently to reduce energy and resource consumption by adhering to good practice
- We will pursue waste product management and recycling vigorously and we will fulfil our obligations and where possible advance initiatives in this area
- We are committed to preventing pollution, to continual improvement in our environmental performance and to influencing and advising our customers and training employees in sound environmental practice

It should be remembered that it is incumbent upon all of us to secure a stable and pollution free future.
